

BASIC SPLIT SYSTEM SELECTION CHECKLIST

1. Are you looking to cool/heat a bedroom?

Yes – Most likely require a split system capacity of 2.5-3.5 kW

No – Go to question 2

2. Are you looking to cool/heat a lounge/living area?

Yes – Most likely require a split system capacity of 5-8kW. This size unit will require the addition of a dedicated power circuit back to the switchboard

3. Is the evaporator (inside unit) being mounted to an external wall?

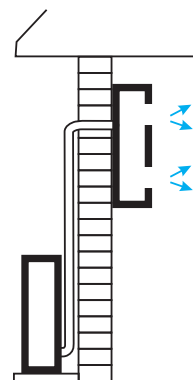

Yes – This is the “normal” means of installing a split system

No – Ring for a quote to determine if it is possible to mount the evaporator in the desired location

4. Is it a “back to back” installation? (see opposite)

Yes – We can provide you with a simple “over the phone” quotation

No – Please call us and we will come to you to provide you with a no obligation quotation
